The Torque Tester consists of a mounting base, servo mounting base, calibrated balance beam, and test weights. The ASI-212-3 requires the optional modification kit (ASI-18-9A) in order to test the SVO-65/-75 Servos. A modified 960M-3 is equivalent to the 960M-5 (ASI-212-5) See the ASI-206 or ASI-348 catalog pages for optional servo/servo mount tools and equipment.
