Description:

The ASI-217 VHF-20/VHF-21 Test Panel provides signals and feedback required for testing, troubleshooting, and alignment of the Collins VHF-20/VHF-21 COM Transceiver.

The test panel comes complete with hardwired UUT and control head (313N-2/4/5) cabling. An adapter cable (ASI-21-7A) is also available in order to use a CTL-22 in place of the 313N-2/4/5.

A user supplied 313N-2/4/5 control head or CTL-22 (with ASI-21-7A) is required for proper operation. The ASI-501-3 COM Control Head Simulator may be substituted for the 313N-2/4/5 control head.
